UX/UI & Visual Designer with 3+ years of experience designing user-centered digital experiences across mobile, web, and enterprise platforms. Translates user insights and complex needs into intuitive interfaces that balance user experience with business goals.

WORK EXPERIENCE

Digital Content Designer | Applied Biological Materials (B2B) Sept 2025 - Present

- Designed **user-focused digital assets** across **web, paid ads, social media, and YouTube**, translating complex product information into clear visuals optimized for each platform.
- Grew LinkedIn audience by **15% to 4.4K+ audiences** through consistent, audience-focused social content and visual storytelling.
- Optimized **motion graphics and video content** based on engagement performance, contributing to **220+ new YouTube subscribers in a specialized B2B market**.
- Created and **A/B tested Google Ads and website banners**, using Google Analytics insights to identify stronger-performing creative and guide future design decisions.
- Developed reusable visual assets across campaigns, helping maintain brand consistency while **speeding up asset production by 34%**.

Visual Designer | Saltus Grammar School April 2023 - Present

- Designed **100+ digital and print touchpoints** across **web, email, social, and events**, adapting information hierarchy and visual communication for different audiences and contexts.
- Accelerated design-to-production timelines by ~25% across 37 school events** by streamlining production files, vendor coordination, and design handoff.
- Designed **responsive website banners and digital communications** for different screen sizes and layouts, improving visual hierarchy, readability, and consistency across user touchpoints.

UX/UI Designer | Unify Social - Mobile platform for newcomers in B.C, Canada May 2025 - July 2026

- Led the **product rebrand and built Unify's first design system across mobile** and marketing touchpoints, improving visual consistency and supporting the project's recognition with the RBC Foundation Best Project Award.
- Conducted **21 user interviews** and synthesized research insights to reshape the Learn feature around user needs, helping it become **the highest-rated feature after launch**.
- Designed and prototyped core mobile experiences in Figma**, including onboarding and community features, translating newcomer needs into intuitive flows for accessing essential information and resources in Canada.

Multimedia Designer | Vancouver Coastal Health Sept 2025 - April 2026

- Took over and **improved an existing design system and e-learning experience** used by 24-25K+ employees and 100+ managers, building within established design patterns to improve usability and clarity.
- Designed and iterated on interactive learning experiences by combining interface design, visual hierarchy, multimedia, and user feedback, contributing to up to a **60% improvement in user retention and learning outcomes**.
- Collaborated with designers, developers, educators, healthcare teams, and stakeholders in an **agile, feedback-driven workflow**, translating user and business needs into practical design solutions.

EDUCATION
